

 **PAVESTONE**

DESIGN FOR LIVING

 **PAVESTONE**

NATURAL
BEAUTY.
HANDMADE
ELEGANCE.

Welcome

Your project represents a considerable investment and should endure many years of seasonal change, it is therefore very important to consider the quality of paving or walling to be used. There are many cheaper landscaping materials available that may not stand the test of time.

Pavestone landscaping products are never engineered to meet the lowest possible price. Instead our commitment is to always offer quality products with consistent aesthetics, dimensional quality and a lasting durability for a fair price.

Pavestone Porcelain is sourced worldwide from audited manufacturers and our Natural Stone materials are only procured from our strategic partners who have been working with us for over twenty years to establish ethical supply chains. Pavestone concrete products are manufactured using electricity supplied only from sustainable and renewable resources which conform to current environmental responsibilities.

Welcome to the new 2026 Pavestone hard landscaping products brochure, which has been designed to both inspire you in finding the perfect materials for your project and also to offer you the practical information needed to make an informed choice.

The Pavestone brand has always been synonymous with both quality and value for money. Our 2026 collection of home flooring and garden landscaping materials have been specifically selected to ensure that you will be able to find exactly the right colours, textures and materials to realise your dream project.

To assist in the design stage, once a paving has been selected we have included some technical detail (Pages 136 - 149). Here you can find a quick reference covering all our products for colour, dimensions, coverage etc. More technical data and laying patterns are available to download from our website www.pavestone.co.uk

DOLOMITE, DUST

Pavestone has adopted the ETI Base Code as a platform for the procurement and distribution of our natural stone products. See page 156 for more information.

LIMESTONE, ABBEY

CHOOSING YOUR PAVING.

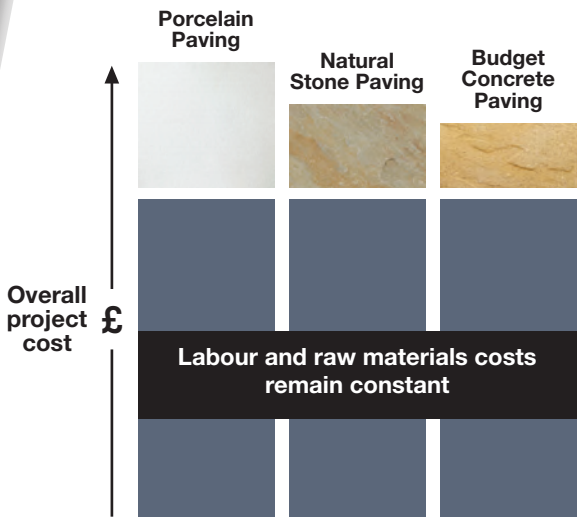

FLY THRU
THIS GARDEN

When it comes to choosing paving, it is important to understand the correlation between the cost of your chosen paving and the final cost of your landscaping project.

Typically, the cost of the paving will be approximately 20% or less of the total project cost, the remaining 80% will be the cost of installation - labour, cement, sand, sub base materials and tool hire.

So, buying a more expensive, better quality paving, will not significantly increase costs. In fact, spending 50% more on your paving may only result in an increase of just 10% to the total project cost.

GET IT RIGHT

with  **PAVESTONE**

CLASSIC SANDSTONE, LIGHT GREY

FLY THRU

THIS GARDEN

You'll be investing time and money when choosing quality paving. Check it's the right colour and style for your patio or driveway. Our brochure will show you plenty of stunning gardens but once you have found a product you like, it's advisable to either check out a display at your local stockist or request a sample.

When you are happy with your final choice, to ensure you will have a garden you can show off to family and friends make sure you get it installed correctly.

Follow our laying advice on page 150 or watch our new step-by-step 'How To' videos on our website, www.pavestone.co.uk. For a quick link through to each video, see page 152.

Request a sample
from your local stockist.
Scan the code to find
one in your area.

CHOOSING THE RIGHT INSTALLER.

Many people like to spend their spare time outdoors. And where better than right outside your back door, in your garden.

We dream of having the perfect garden and spend lots of time and effort searching for the look and style to create the ideal outdoor living space. Hours can be spent finding inspiration leafing through magazines, or watching TV shows. And that's before you've even started choosing the types of building materials!

It's not just the huge amount of time that's invested to create your dream project but it can also be a significant financial commitment too.

So, can you imagine the disappointment, when you have spent all that time and money, to see a poorly installed patio or driveway?

Remember the only part you see at the end of the job is the paving, so not only should you choose the best product you can afford but also choose your installer wisely.

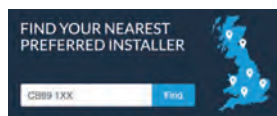

Don't just go for the cheapest quote. Ask to see references and photos from previous jobs. Even better, go and visit some of their installations. Looking at projects from 2 or 3 years ago will also show you how they have stood the test of time.

Always do your research. Speak to family and friends for good recommendations and also check local social media as well.

Good landscapers will give their time, listen to your needs and will help create your patio to give you a long term garden you can be proud of. A good landscaper, with good laying practices, may come at a price but it's well worth the investment.

If you need help finding a landscaper, visit our website and type in your postcode to find one of our preferred installers near you.

"Your dream patio could turn out to be a nightmare if you don't take care when choosing your landscaper"

Top tips for choosing a landscaper

Be extremely cautious with cold callers.

Get at least three quotes.

Ask family & friends for recommendations.

Look at websites and local social media.

Check out customer reviews.

What are their payment terms?

Do they have liability insurance?

How long are their guarantees?

Are they accredited by any industry organisations?

Ask for references.

Where possible, ask to visit their previous work.

Choose a Pavestone Preferred Installer.

CHOOSING THE BEST INSTALLER.

 **PAVESTONE**

PREFERRED INSTALLER

FLY THRU

THIS GARDEN

At Pavestone, we believe that quality landscaping materials deserve to be installed by top quality installers, which is why we've created a database of 'Pavestone Preferred Installers'.

Unlike many other landscaper schemes, our Preferred Installers are all vetted and hand picked by our very own industry experienced staff.

DECKWOOD, CINDER

If you would like more information about being one of our Preferred Installers, give us a call on 01386 848650 or email enquiries@pavestone.co.uk

Garden created by
Premier Developments, Gwynedd

Installers are chosen on several criteria, their innovative use of materials, their creative design, but above all their high level of workmanship. Each and every installer shares our vision and is dedicated to creating beautiful patios and driveways for their customers. We are proud of what we collectively achieve for homeowners, and love to show off our products, as well as our installers handy work.

Many of our Preferred Installers projects are showcased throughout this brochure. None are computer generated, they are all real patios, in real gardens. All proudly displayed to help inspire other homeowners create their very own outdoor living space. We don't charge installers to be on our list. All we ask, is they continue their great work and keep sending us stunning gardens to photograph.

Of course, that's not the only benefit of being a Pavestone Preferred Installer. We also provide many other advantages of joining our 'family', such as marketing support, your own company branded Pavestone brochures, social media exposure to our thousands of followers, free product samples, accompanied site visits with home owners, your company listed on the Pavestone website, industry experienced installation support and much, much more.

Porcelain Paving represents the pinnacle of modern paving solutions, blending elegant design with cutting-edge, vitrified technology for unparalleled durability and style.

The Pavestone Porcelain Collection offers an array of options to suit every taste and budget. From wood-effect planks and stunning natural stone replicas to a wide variety of textures and colours, our porcelain paving delivers a level of realism that rivals nature itself.

Engineered to resist algae, withstand frost, and require minimal maintenance, Porcelain Paving is the ideal choice for those seeking lasting beauty with easier upkeep.

SETTS & EDGING

The perfect finishing touch to your patio.

Porcelain Setts are available in versatile sizes 100x100mm and 200x100mm and are perfect to create a beautiful, finished edge for pathways and can create a striking 'picture frame' effect around patios. They pair effortlessly with our porcelain paving range, enhancing your outdoor design with elegant contrast and style. For a more rustic look, the 250x100mm Tumbled Setts work well to bring an aged appearance to your patio border edge.

These stylish and contemporary planks give the perfect finish to your patio or path. With straight edges on all four sides, the porcelain plank edging will complement most of the porcelain paving range.

They can be laid flat as a linear border edging or even laid alongside each other as a patio feature. Alternatively, if your lawn or planted area is higher than your patio, they can also be installed vertically. For that extra touch of detail, a bull nose edge will certainly add panache to your paving.

See page 54 for more information about our bespoke cutting and profiling.

SEE PAGE 139 FOR FULL TECHNICAL SPEC

BESPOKE CUTTING & PROFILING.

BLACK GRANITE

PAVERS & SETTS

Rustic charm.

Perfect for crafting winding, rustic pathways that meander gracefully through the garden. They also create attractive borders for patios and driveways, adding a charming contrast that enhances and defines any paved area.

PORCELAIN SETTS

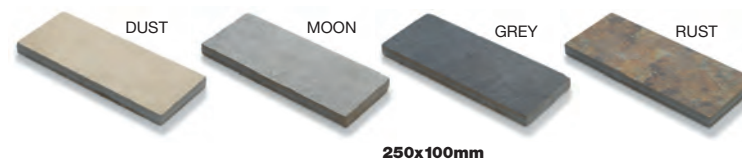

The perfect finishing touch to your patio.

Porcelain Setts are available in versatile sizes 100x100mm and 200x100mm and are perfect to create a beautiful, finished edge for pathways and can create a striking 'picture frame' effect around patios. They pair effortlessly with our porcelain paving range, enhancing your outdoor design with elegant contrast and style.

For a more rustic look, the 250x100mm Tumbled Setts work well to bring an aged appearance to your patio border edge.

Interloc Edging

With a premium smooth finish and pencil line edges, Interloc provides an elegant edge to your patio or driveway. This robust edging has 'oversize' dimensions giving it additional 'inground' stability. Combined with its unique interlocking ends, it is an ideal choice for finishing off driveways.

Unlike many other concrete edgings, Interloc has sealed 'face' edges making it more algae, moss and stain resistant. Available in three shades, this very durable edging complements much of the block paving range and also works beautifully with porcelain paving too.

See page 145 for technical information.

THIS GARDEN

Walling plays a vital role in transforming a garden landscape, adding depth, structure, and visual interest far beyond simply marking boundaries. It can be used to introduce varying levels, such as raised patios or elevated planting areas, enhancing the overall garden design.

DECORATIVE WALLING & CLADDING

Cottage Walling	114
Dry Fell Walling	115
Moodul Modular Walling	116
Burford Walling	118
Slate Stack Cladding	120
Natural Stone Cladding	122
Porcelain Cladding	124

The Pavestone Walling range includes both natural stone and reconstituted (man-made) walling options. Natural stone blocks, with their unique shapes and sizes, bring a charming rustic appeal to properties in rural settings or historic landscapes where natural stone is a defining feature.

Reconstituted stone walling, crafted from authentic Cotswold Limestone, mimics the texture and appearance of natural stone but offers uniform dimensions, making installation as straightforward as standard brickwork.

SEALERS & CLEANERS

Protecting and maintaining your investment.

Protecting your patio and walling will keep it looking magnificent and may well save time and money in cleaning products later on.

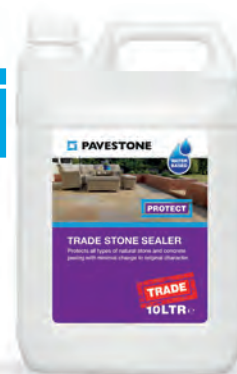

CLASSIC SANDSTONE, BUFF

Our scientifically advanced products clean, protect and maintain natural stone and porcelain. Pavestones range of sealing and maintaining products will ensure your patio looks fantastic year after year.

PROTECT

TRADE STONE SEALER

Protects all types of natural stone and concrete paving with minimal change to original character.

RESTORE

RUST STAIN REMOVER

Organic formula that breaks down and removes orange oxide stains. Suitable for stone and porcelain.

CLEAN

PATIO CLEANER

Heavy duty cleaner for removing stubborn ground in dirt and grime from stone and porcelain paving.

PROTECT

NATURAL FINISH STONE SEALER

Protects all types of natural stone and concrete paving with minimal change to original character.

RESTORE

IRON STAIN REMOVER

Removes rust breakouts, rust discolouration, cement and mortar stains from ferrous hard stones.

CLEAN

PORCELAIN CLEANER

A gentle after-care cleaner especially formulated for use on porcelain paving. Cleans without damaging the grout or tile.

CLEAN

DRIVEWAY CLEANER

Removes black spot, lichen, moss and stains from driveway block paving, concrete and natural stone paving.

CLEAN

BLACK SPOT & ALGAE REMOVER

Removes black spot, lichen, moss and stains from all types of external natural stone, concrete and porcelain paving.

PROTECT

COLOUR ENHANCING STONE SEALER

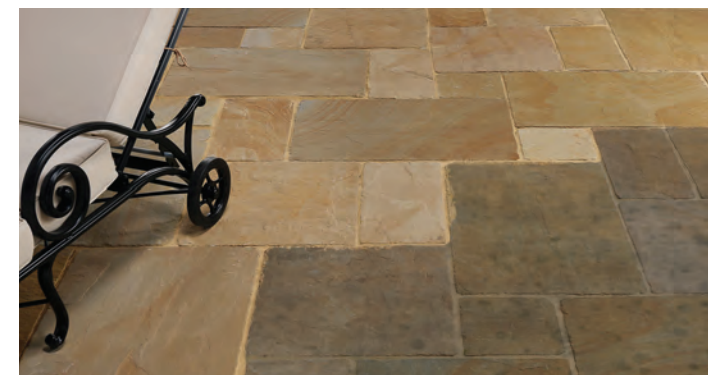

Deepens colour and enhances the characteristics of natural stone and concrete paving.

PROTECT

PORCELAIN TILE PROTECTOR

Pre-grout treatment for use during porcelain paving installation. Protects against surface grout residue without altering the paving characteristics.

RESTORE

CEMENT, GROUT & SALT RESIDUE REMOVER

Acid replacement cleaning solution for removing cement, grout and efflorescence residues. Suitable for porcelain and natural stone paving.

RESTORE

BLACK STONE REJUVENATOR & SEALER

Restores the colour and protects dark grey and black natural stone paving.

RESTORE

RESIN RESIDUE REMOVER

Removes resin films from the surface of natural stone and porcelain paving commonly caused by jointing compounds.

PLEASE NOTE. Do not use any cleaning, restoring or sealing products when surface temperatures are under 5°C or over 25°C.
For full instructions, please refer to the bottle label or download a Data Sheet from www.pavestone.co.uk/information/product-data-sheets.

- No specialist tools
- Fast application
- No waste - only mix what you need
- Simple to use
- Cost effective
- Quick curing
- Can be applied to wet surfaces even when raining
- Prevents weed growth
- Pet friendly

"Quality paving deserves a professional finish. Pavestone Pointfix is perfect for fast and easy jointing."

All Weather Epoxy Jointing Compound*

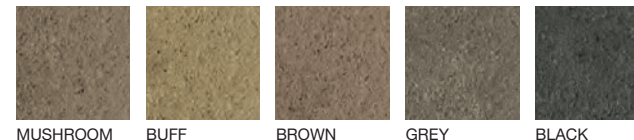

Pavestone Pointfix is a superior two pack multi-use jointing and repair compound. One pack contains epoxy resin within the compound and the other epoxy hardener. Once thoroughly mixed the jointing compound cures to create a permanent hard jointing material.

There are no liquids or powders to measure and mix in, so mixing and applying Pointfix is much cleaner and easier than traditional sand and cement mortar. Pointfix is specifically designed for pointing and infilling between many types of surfaces including concrete paving, natural stone paving, brickwork and stonework.

If it rains, or is forecast to rain, completing a traditional pointing project can become a major problem. Pointfix eliminates this problem as it can be applied even when the paving or bricks are wet and you can even carry on pointing when it rains.

Available in 5 colours

Pointfix comes in five shades to perfectly complement any paving colour. The 50/50 mixing ratio means you only need to mix what is needed, cutting down on waste.

Please note. Black is not recommended for light coloured paving.

PLEASE NOTE. *Pointfix is not suitable for Porcelain paving.*

Professional pointing in 6 simple steps

Step 1
Open both packs, measure 50/50 ratio of each & mix until uniform in colour.

Step 3
Compact firmly into joints using a jointing tool.

Step 5
Compact the surface to give it a clean flat finish.

Step 2
With a soft brush/broom, push Pointfix mixture into the gaps.

Step 4
Refill, if necessary, using a small soft hand brush.

Step 6
Brush off any excess & wipe off any remaining residue with a damp sponge.

For additional technical information, please refer to the label on the reverse of the Pointfix tub.

Essential fixing products

Wall & Cladding Adhesive - High performance, quick setting and non slip, tile & walling adhesive. Ideal for porcelain, natural stone & concrete.

Priming Slurry - A polymer modified cement based priming slurry designed to facilitate the bonding of non-porous paving materials. Essential when laying Porcelain & Granite paving. Also recommended for the installation of all natural paving. Pavestone Priming Slurry will improve the bonding strengths and lifespan of your project and can be used with any of our paving products.

Tile Grout - A specially formulated, flexible, rapid setting paving grout providing a uniform joint colour. The fine texture provides a smooth, stain, mould and water resistant finish which is recommended for both Porcelain and some Natural Stone with sawn edges.

Available in 6 colours

PLEASE NOTE. Do not use any cleaning, restoring or sealing products when surface temperatures are under 5°C or over 25°C. For full instructions, please refer to the bottle label or download a Data Sheet from www.pavestone.co.uk/information/product-data-sheets.

Tile Grout coverage

DIMENSIONS

Rectified: Rectified tiles have sawn, straight edges to achieve a dimensionally precise sizing per batch.

Non Rectified: Non rectified are produced with a nominal dimensional tolerance relating to each batch.

LAYING ADVICE

Please note: Pavestone Priming Slurry must be applied to the reverse of each porcelain tile during the laying process. Please refer to website for full laying instructions.

IMPORTANT

Pointfix, or any other resin based jointing compounds, are not suitable for Porcelain.

Bowing: There is an international standard (ISO 1054.2) that due to the manufacturing process, porcelain can have a slight bow.

There is a tolerance of +/-0.5% of the overall length of the tile.

For further information please refer to the Porcelain Laying Guide on our website.

Batches: Porcelain paving is made in batches and each batch can vary in colour and/or size therefore it is imperative to buy your total requirements from one batch.

Use Pavestone Porcelain Tile Protector before grouting

PLEASE NOTE. Dimensions stated on all paving ranges are nominal and for guidance only.
ALWAYS check actual paving plan size before building any other structures such as walls and borders.

Medium (2)	25	600	1500	2400	2700 ²
No. of pieces	-	1	8	16	16

Buff, Raj Blend, Fossil, Modak, Light Grey & Oxford

Circles are supplied as a complete kit. The information per ring is for measurement guidance only and is approximate.

Squaring off kits are sold separately.

* Oxford is only available as a complete circle with squaring off kit.

The correct way to lay circles is to work from the inside outwards. As with any of our natural stone range, we recommend that the product is laid and tamped down on a firm mortar bed.

ALWAYS dry lay prior to final installation to ensure correct spacing is achieved.

ESSENTIAL ADVICE

always use a slurry primer
See page 135 for paving accessories

PORCELAIN COLOUR & SHADES

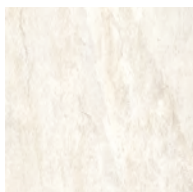

Deciding on the right product for your patio may not always be that easy, especially with such a wide choice in our porcelain paving range. To help you choose the right colour for your landscaping project, we have grouped our range into just two palettes.

A warm palette, from light dusty beiges to darker buffs and browns, along with a choice of richer deep rust shades and also soft shades of timber in our Deckwood range.

PLEASE NOTE. The true colour of porcelain can be different from illustrated above. It is essential that you view the actual product, either on a display at your local stockist, or by requesting a sample.

Choosing a colour from our cool palette can give a dramatic impact to your patio, with dark greys and anthracites. Lighter greys will give your garden a sophisticated, contemporary look and feel.

LA MODA, GREY

GET IT RIGHT

with  PAVESTONE

LIMESTONE, ABBEY

It's attention to detail that counts. Follow these do's and don'ts and you'll end up with a result you can show off to family and friends with genuine pride in a job well done.

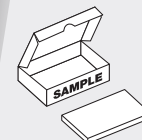

Above all, take your time and don't skip a single step. You've invested time and money in choosing quality paving that's the right colour and style for your patio or driveway. Now you need to take the same care, if not more, to make sure you lay each and every slab neatly, cleanly and competently.

Before you place your order

Check you're happy with your choice.

Still not sure?

Request a sample from your stockist.

**View a display at your stockist.
See website for your nearest stockist.**

+10%

Buy extra paving to allow for cuts and breakages. **DOUBLE CHECK your calculations.**

When buying all types of paving, **ALWAYS buy from one batch.**

Before you get started

Inspect paving on delivery*

Always check the paving on delivery and before you start laying.

If absent during installation **ALWAYS inspect paving before going away.***

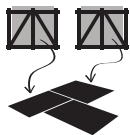

Dry lay before laying permanently

Essential to make sure the paving fits the area to be laid. Especially where dimensional accuracy is required, such as circle kits.

PLEASE NOTE. *Dimensions stated on all paving ranges are nominal and for guidance only. **ALWAYS** check actual paving plan size before building any other structures such as walls and borders.*

Now you're ready to start

Lay from different packs to blend colours.

Draw randomly from different packs/crates to assist colour blending.

Porcelain & Natural Stone must always be primed on the back with a slurry primer.

This improves the bonding strengths and will extend the lifespan of your project.

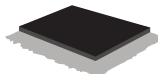

Always follow the instructions on the tub.

Space out paving to correct width.

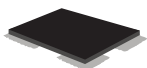

Paving should be spaced to even out joint widths.

NEVER butt joint.

ALWAYS lay with a 'full contact' bed of mortar.

This will ensure complete contact is made to the paver, with no voids, providing a much stronger patio.

NEVER use the spot bed method.

This will create 'voids' which attract insects and vermin. The paving will be also be susceptible to fracture when loaded and can cause staining issues. Paving laid with any void bedding will invalidate any guarantees.

Tap pavers to make 'full contact' with the mortar.

Using a rubber mallet, tap the pavers making sure they are the correct level.

Natural Stone

Chamfer down

Concrete

Chamfer up

Chamfered edges. Lay paving the correct way up.

Natural stone is hand cut.

The top edge will be clean and straight with the bottom much rougher.

Concrete comes out of a mould, with the detailed face on the smaller side.

ADVERSE WEATHER

Never lay, point, seal or clean in adverse weather conditions (**Surface temperature** must not be less than 5°C or more than 25°C).

Cleaning up & sealing

NEVER use acid to clean paving.

This will damage the paving. Always use a recommended proprietary cleaner.

See page 132 for our range of sealants & cleaners.

Visit www.pavestone.co.uk/installation for more information

* When paving has been installed, it is deemed that the product has been checked and accepted. Pavestone do not accept any liability if the product has not been inspected prior to installation.

PAVESTONE
HOWTO
VIDEOS

How to install the right way

**Now it's even easier
to find out the correct way
to clad walls & lay paving.**

Our extensive range of 'How to' videos will show you everything you need to know to help create your dream patio. Whether you need to see the whole process from start to finish or just need reassuring on certain stages, our videos will show you all you need to know.

From marking out the area, to pointing up the paving, Pavestone's Landscaping Expert Mark Brown, shows you every step to help you create a natural stone patio.

Although Porcelain is laid similarly to Natural Stone, Mark guides you through the slight differences, such as grouting the joints and how to cut Porcelain using different power tools.

HOWTO

HOWTO
CUT PORCELAIN

DRIVING OUR WAY TO A £MILLION!

For the last 8 years, Pavestone UK Limited have staged the renowned Pavestone Rally.

These biennial challenges are the biggest singular fundraising events within the building sector, and over the years have raised thousands of pounds for Teenager Cancer Trust, British Heart Foundation, Variety and CRASH. In addition to these well know charities, the rallies have also raised much needed funds for the Rainy Day Trust and the Lighthouse Charity, both offering emotional, physical and financial wellbeing support to construction workers and their families in times of need.

All the money raised is split equally amongst the good causes and in 2025 the teams also nominated 22 of their own chosen charities, which were more personal to the team members taking part.

Over the years the rallies have grown in attendance with more and more people wanting to take part in what is fast becoming the talk of the industry.

Teams have to buy a 'road legal' car for under £1000 which they then have to drive for five days across Europe to reach the finishing line. All in outrageous fancy dress, each day teams have to take on hilarious challenges along the way, taking in some fantastic scenery and discovering many beautiful villages, towns and magnificent European cities.

There is such a feeling of heart warming camaraderie with all the teams. Making new friends, creating many fond memories, every year the Pavestone Rally family grows. What better way to raise money for charity?

To date, all the rallies have raised over £700,000. Let's hope the 2027 Rally breaks the million!

and 22 other well deserving charities.

To find out more about 2027 Rally, email pavestonerally@pavestone.co.uk or visit our website.

TRADING ETHICALLY

Pavestone has a fundamental belief that the poor and vulnerable within the communities that produce our stone products should derive benefits from our local trading beyond the simplicity of the stone workers pay. We work closely in partnership with our suppliers to improve the quality of life, not only for those immediately employed by our supply partners but also all those living in and around their community.

Pavestone has always been acutely conscious of the concerns raised through consumers' increasing awareness of the ethical issues associated with the production of natural stone products from India.

For many years we have been importing only from audited stone producers who can successfully demonstrate that their processes meet the moral and ethical codes as established by the ETI (Ethical Trading Initiative) Base Code. In doing so we have contributed to the economic success of the communities in which our stone processors work and have helped to provide a safer and more secure working environment for our supplier partners' employees.

Pavestone is committed to ensuring that the working conditions of employees in our partner supply companies meet or exceed international standards and for many years we have adopted the ETI Base Code as a criteria for our supply chain.

The ETI Base Code

1. Employment should be freely chosen with no forced, bonded or involuntary labour.
2. Workers have the right to join or form trade unions of their own choosing and to bargain collectively.
3. A safe and healthy working environment shall be provided.
4. Child labour shall not be used.
5. Wages should always be enough to meet basic needs and to provide some discretionary income.
6. Working hours are not excessive and comply with national laws and benchmark industry standards.
7. Workers should be treated equally regardless of race, caste, national origin, religion, age, disability, gender, marital status, sexual orientation, union membership or political affiliation.
8. Regular employment for individuals should be provided where work is ongoing.
9. No harsh or inhumane treatment of workers. Physical abuse (or threat of), sexual or other harassment including verbal abuse or intimidation shall be prohibited.

For further information on the Ethical Trading Initiative and the Base Code please visit:

www.ethicaltrade.org

SUSTAINABILITY

Pavestone strives to minimise and continually reduce the adverse impacts of all our operations both in the immediate, local environment and throughout our supply chain globally. We also seek to contribute to the economic success of the communities in which we work and to provide a safe, secure working environment for both our employees and our supplier partners' employees.

Corporate Social Responsibility

Our Corporate Social Responsibility initiatives seek to make our businesses more accountable for our actions and decisions.

We are committed to full legal compliance in all that we do and to make our business accountable to those that we directly or indirectly impact upon through the adoption of good practices.

Practices include:

- Creating a safe environment and a rewarding career for all our employees.
- Hold regular local residents 'open meetings' to discuss our impact on their local life.
- Monitoring and managing the environmental impact of all our operations.
- Monitoring and understanding the environmental impact of our suppliers operations.

Environmental Policy

Pavestone recognises that it has an obligation to help protect the environment and the neighbourhoods in which we operate. Our awareness is a fundamental part of the Pavestone business strategy. We will seek as far as is reasonably practicable to minimise the company's effects on the environment.

Main initiatives include:

- Ensuring environmental issues are considered carefully at all levels when planning and conducting business activities and that our employees understand and act in accordance with our environmental aims.
- Working co operatively with regulatory bodies including the environment agency and Local Authorities in addition to our industry trade association the Builders' Merchants Federation (BMF) so as to facilitate full awareness and contribution to environmental legislation changes.
- Managing our activities in line with best business practice to control the impact on the local community from noise, dust, light emissions and traffic movements.
- Annual reduction in energy consumption water usage waste production and improved segregation for reuse/recycling.
- Production of environmentally friendly ranges of products.

GENERAL INFORMATION

Dimensions and coverage

Dimensions stated on all paving ranges in this brochure are nominal and for guidance only. The area coverage of natural stone quoted in the brochure includes the appropriate joint widths to enable the correct amount of product to be purchased to cover a given area. Where space is critical and particularly when a circle or feature kit is being incorporated into a design, it is essential that the product is dry laid first in order to understand the gaps required to make the feature work. Retrospective correction of gaps once a job is underway is not always possible. Always check actual paving plan size before building any other structures such as walls, creating borders and installing drains and edgings. Basic laying patterns with joint widths are available upon request from Pavestone. We reserve the right to change dimensions and pack sizes without notice.

Colours

Our porcelain, natural stone and concrete products can vary slightly in colour from time to time. We therefore cannot guarantee that products from different batches will always have identical colouration. Therefore we advise, when using several packs of paving or walling on a project, that the product is drawn randomly from all of the packs being used to achieve an overall well blended appearance. This eliminates patches of colours and gives a seamless, more natural blend of colours to the finished project.

The swatches reproduced in this brochure are as accurate as reprographic processes allow and are indications of the overall hue produced by the variety of colour variations in the given product. It is essential that you view the actual product at your stockist prior to purchasing. It is also advisable to inspect the product as soon as it is delivered to site, to ensure it is suitable prior to installation.

Maintenance

Pressure washing is not recommended as it could damage the jointing and the face of concrete paving. We have a range of cleaning & sealing products and are happy to advise on the use of these if warm soapy water and a stiff broom fails to satisfy. Specific spillages of strong coloured liquids should be wiped off the paving immediately with a damp cloth to prevent any permanent damage.

Warranties

In the unlikely event of our products reaching you in a less than satisfactory condition, please notify your supplier immediately who will be happy to organise replacements. Please note that if a product is knowingly laid with a defect apparent prior to laying then we reserve the right not to replace the product and will not accept any responsibility for costs incurred to rectify. Defects affecting the product functionality that appear, within one year of purchase, will be corrected by way of replacement product and may or may not include some assistance to rectify depending on the circumstances.

When paving has been installed, it is deemed that the product has been checked and accepted. Pavestone do not accept any liability if the product has not been inspected prior to installation.

No consequential losses will be accepted.

All products carry the UK Conformity Assessed (UKCA) certification markings on the product packaging demonstrating their technical conformity.

Sealing

Pavestone have a range of sealers. Always use in accordance with the manufacturers instructions.

Porcelain paving

Porcelain Paving needs to be laid on a sub base and full contact mortar bed, like natural stone paving. However, and just as important, a slurry primer must be applied to the reverse of each tile prior to laying to facilitate full adhesion. Without this coating, adhesion of the tile may fail.

For full instructions please visit our website:

<http://www.pavestone.co.uk/technical-detail/laying-instructions/>

Porcelain paving is made in batches and each batch can vary in colour and/or size therefore it is imperative to buy your total requirements from one batch. It is also best practice, prior to laying, to open as many packs as possible and place one tile from each pack next to each other to make sure you are happy with the colour and size.

As porcelain is made in very high temperatures there is an International Standard (ISO 1054.2) that allows Porcelain Manufacturers a tolerance for a bow. This is generally seen on larger rectangular tiles and any lipping can be minimised by offsetting the pattern to a 2/3 or 3/4 bond.

Cladding

It is not advised to install Pavestone Cladding above 3 metres.

Grouting

Areas to be grouted must be fully dry, especially the joints. Paving should also be thoroughly cleaned after grouting. We recommend the use of Pavestone Porcelain Tile Protector prior to grouting to aid easier cleaning.

Note

Product ranges, colours and sizes available are correct at the time of going to print. Pavestone reserves the right to alter its offering at any time, without prior notification.
